`funbiogeo` functionalities and roadmap

Raw data

Site-species	Trait	Location	Environment

Minimal features

Site-species → Trait → Location → Environment

Selected sites with P_{cover}

Location environment

Site Avg. Environment

Upscaled communities

Site functional diversity indices

Environment vs. diversity indices

Upscaled comm. diversity indices

FD vs. Env. biplots

diversity indices maps

## Additionnal features

Parallel computation — Shiny app to select data — Sparse matrices
